

Discussion: Does Location of Economics Department Impact Student Perception of the Major?

Paper By: Mary Flannery and Kristen Collett-Schmitt

Discussant:

James M. Murray, Ph.D.

University of Wisconsin - La Crosse

November 18, 2017

Southern Economic Association
2017 Annual Conference

Business Community Engagement?

- Internship prevalence, requirements?
- Class-embedded client research experience in program?
- Do student perceptions of these opportunities influence choice of major?
- Is this part of the school's reputation?

Expand Exploration of Schools?

- Go beyond to the top 45 schools
- Student body and school characteristics are a different population than many of your readers
- There may be more homogeneity in lower-tier, say public regional comprehensives

Student Survey

- Selection bias regarding sampling principles of microeconomics students?
- Look into undecided majors. Are there different degrees of undecided?
 - My institution: Undecided major with decided college.
- When in college career do students decide the economics major? Different by major?

Modeling Students' Major Choice

- Estimate some kind of regression
- Quantify the *relative importance* of explanatory variables
- How much variability in major choice do we understand?
